

Console Connect and CBC Tech collaborate to extend on-demand connectivity services

HKT (SEHK: 6823) – HONG KONG, 14 August 2024 – Console Connect, a global Network-as-a-Service (NaaS) platform, and CBC Tech, a leading next-gen NaaS provider in Asia, have announced a strategic collaboration to mutually assure seamless on-demand connectivity services.

This collaboration empowers businesses with agile connectivity solutions, bridging the gap between international markets and Asia's rapidly growing digital landscape.

Through an interconnection, Console Connect is able to extend the reach of its automated network fabric into CBC Tech's on-ramps in multiple locations.

At the same time, CBC Tech is able to expand the global presence of its NaaS using Console Connect's automated platform, which is accessible from more than 1,000 data centres and all major hyperscale cloud providers worldwide. Through Console Connect's reseller collaboration programme, CBC Tech will be able to offer businesses access to a comprehensive suite of connectivity solutions, spanning across borders and optimising network performance.

Marc Halbfinger, CEO of Console Connect, said, "Our collaboration with CBC Tech demonstrates how NaaS innovation is enabling seamless platform coverage to facilitate data movement and delivery of services across borders. We look forward to further growing our relationship with CBC Tech and helping more customers experience the benefits of agile and on-demand connectivity."

Richard Fung, CEO of CBC Tech, said, "We are excited to collaborate with Console Connect to deliver enhanced connectivity solutions to businesses in our footprint. By leveraging our combined expertise and infrastructure, we are empowering enterprises with reliable and scalable network services to support their digital transformation initiatives."

Console Connect will also leverage CBC Tech's last mile and local loop connections to widen the coverage of its Edge Port solution.

About Console Connect

Console Connect is a platform for Software Defined Interconnection® of applications and infrastructures. It allows users to self-provision private, high-performance connections among a global ecosystem of enterprises, networks, clouds, SaaS providers, IoT providers and applications providers.

Console Connect is the only digital platform that is underpinned by one of the world's largest private networks and a Tier 1 global IP network that is ranked in the top 10 for IPv4 and IPv6 peering, delivering higher levels of network performance, speed, and security to meet the digital needs of today's interconnected users and communities.

Accessible from 1,000+ data centres in 50+ countries worldwide, the platform is integrated with all major hyperscale cloud providers, including AWS, Google Cloud, IBM Cloud, Microsoft Azure, Alibaba Cloud and more. Through the Console Connect portal or via its API, users can access a broad range of native and third-party solutions.
